

**IN THE CLAIMS**

1-57 (canceled)

58. (currently amended) A kit, comprising:

a first receptacle comprising:

a body containing a cosmetic comprising a first substance for coloring hair; and

a neck providing an opening into said body, said neck including a first portion having a first inside diameter and a first fixing means, a second portion located between said body of said receptacle and said first portion, and a shoulder connecting said first portion to said second portion, said second portion having a second inside diameter and a second fixing means, wherein said second inside diameter is greater than said first inside diameter; and

at least one first accessory including a first applicator having teeth~~configured for removably fixing onto said neck of said receptacle, said accessory including and an assembly skirt that cooperates with said second portion, and said assembly skirt including:~~

a free end;

skirt fixing means cooperable with said second fixing means on said neck of said receptacle for removably fixing said first accessory onto said neck; and

an annular bead integrally formed on an inside surface of said assembly skirt, said annular bead including a sealing surface that abuts said shoulder and is spaced from said skirt fixing means when said first accessory is fixed to said neck.

wherein said skirt fixing means is situated between and spaced from both said free end and said annular bead.

65. (currently amended) The kit according to claim ~~104~~58, wherein at least one of said teeth includes at least one dispenser orifice.

66. (previously presented) The kit according to claim 65, wherein said at least one dispenser orifice is spaced from a free end of said at least one of said teeth.

67. (currently amended) The kit according to claim 66, wherein said at least one dispenser orifice substantially limits ~~at the cosmetic to be dispensed from~~ dispensing other than between said teeth.

68. (currently amended) The kit according to claim ~~63~~58, wherein said first applicator includes at least one row of teeth including a pair of end teeth located at the respective ends of said at least one row of teeth, said pair of end teeth having dispenser orifices which face others of said at least one row of teeth.

69. (currently amended) The kit according to claim ~~63~~58, wherein said first applicator includes at least one row of teeth including a pair of end teeth located at the respective ends of said at least one row of teeth, said pair of end teeth having no dispenser orifices.

70. (currently amended) The kit according to claim 68, wherein at least one tooth ~~of said row of teeth located between~~ said pair of end teeth includes a plurality of said dispenser

orifices on the exterior of said at least one tooth such that said plurality of dispenser orifices are parallel to said at least one row of teeth.

71. (previously presented) The kit according to claim 70, wherein said plurality of dispenser orifices are located on opposite sides of said at least one tooth.

72. (currently amended) The kit according to claim 70, wherein all of said teeth ~~located~~ between said pair of end teeth include at least one dispenser orifice.

73. (previously presented) The kit according to claim 65, wherein said at least one of said teeth includes a groove extending from a free end of said at least one of said teeth to said at least one dispenser orifice.

74. (currently amended) The kit according to claim ~~104~~58, wherein said first applicator includes at least six teeth, each of said teeth including at least one dispenser orifice.

75. (currently amended) The kit according to claim ~~104~~58, wherein said teeth are of substantially the same length.

76. (currently amended) The kit according to claim ~~63~~58, wherein said first applicator is made by molding.

77. (previously presented) The kit according to claim 58, wherein at least one of said first fixing means or said second fixing means includes a thread, said kit having at least one accessory adapted for screwing onto said thread.

78. (currently amended) The kit according to claim 58, wherein at least one of said first fixing means or said second fixing means ~~comprises~~includes at least one snap-fastening member, said kit including at least one accessory ~~arranged with~~having at least one complementary snap-fastening member ~~suitable for~~adapted to cooperatinging with said at least one snap-fastening member.

79. (currently amended) The kit according to claim 58, further including ~~at least two~~a second accessoriesy of a different kinds than said first accessory.

80. (currently amended) The kit according to claim 79, wherein ~~a first of said two~~a second accessoriesy is adapted for cooperating with said first portion of said neck ~~and a second of said two accessories is adapted for cooperating with said second portion of said neck~~.

81. (canceled)

82. (canceled)

83. (currently amended) The kit according to claim ~~82~~79, wherein said ~~at least one~~a second accessory is selected from the group consisting of a cap, an endpiece, ~~a~~a second applicator, and a second receptacle.

84. (canceled)

85. (canceled)

86. (canceled)

87-96. (canceled)

97. (canceled)

98. (currently amended) The kit according to claim 58, wherein said shoulder comprises a planar annular surface ~~extending on~~ on an outside surface of said neck, said shoulder being perpendicular to said neck.

99. (previously presented) The kit according to claim 58, wherein both said first fixing means and said second fixing means include threads.

100. (canceled)

101. (currently amended) The kit according to claim 58, wherein said first receptacle comprises a plastic material.

102. (currently amended) The kit according to claim 58, wherein said first accessory is configured for removably fixing onto said neck of said receptacle by fastening only on said second fixing means.

103. (previously presented) The kit according to claim 99, wherein said threads enable screw fastening by turning in a same direction.

104. (canceled)

105. (canceled)

106. (canceled)

107. (currently amended) The kit according to claim 58, wherein said first accessory does not include a sealing lip that abuts an inside of said neck of said receptacle.

108. (new) The kit according to claim 58, further comprising a second receptacle containing a second substance different than said cosmetic, said second receptacle including third fixing means cooperable with said first portion of said neck.

109. (new) The kit according to claim 108, wherein one of said first substance and said second substance is a coloring agent and the other of said first substance and said second substance is an oxidizer.

110. (new) The kit according to claim 79, wherein said second accessory is selected from the group consisting of an endpiece, a second applicator and a second receptacle.

111. (new) The kit according to claim 110, wherein said endpiece has a single dispenser orifice.

112. (new) The kit according to claim 58, wherein said annular bead is a continuation of a cylindrical inside surface of said first accessory.
